

Laser Spare Parts Quick Catalog

Laser spare parts and sourcing support for fiber cutting, marking, welding, and cleaning systems.

Send machine model, part photo, size, original part code, and quantity for compatibility checking before quote.

What We Help With

Need	Support
Fiber laser cutting consumables	Protective lenses, nozzles, ceramic rings, lenses, cables, and selected cutting head parts.
Laser marking parts	Field lenses, galvo scanners, control cards, red light pointers, and selected replacement parts.
Laser welding spare parts	Protective lenses, welding nozzles, wire feeder parts, torch parts, and related consumables.
Chinese laser machine parts	Sourcing support when the original supplier is slow, unclear, or unavailable.
Remote troubleshooting	Basic support for part identification, compatibility checking, and supplier-code matching.

Common Parts List

Category	Common Parts	Details Needed
Fiber cutting	Protective lens, nozzle, ceramic ring, focusing lens, collimating lens	Cutting head model, size, photo, quantity
Fiber cutting head	Sensor cable, connector parts, selected Raytools/WSX/Precitec-style parts	Head model, old part photo, original code
Laser marking	Field lens, galvo scanner, control card, red light pointer	Wavelength, working area, software, old part photo
Laser welding	Protective lens, welding nozzle, wire feeder parts, torch parts	Torch model, wire size, photo, quantity
Laser cleaning	Protective window, selected head parts, cables, lenses	Cleaning head model, size, machine photo

How To Request A Quote

1	Send your machine type and brand/model.
2	Send photos of the old part, label, or part location.
3	Send key size details such as diameter, thickness, thread, focal length, or cable length.
4	Tell us the required quantity and destination country.
5	We check compatibility first, then provide price and lead time.

Compatibility Notes

Laser spare parts often have similar appearance but different dimensions, coatings, connector types, or software compatibility. To reduce wrong purchases, we recommend confirming details before ordering instead of buying directly from a shopping cart.

Useful Details To Send

Machine	Fiber cutting / marking / welding / cleaning
Brand or model	Machine brand, machine model, or supplier name
Head or torch model	Cutting head, marking head, welding torch, or cleaning head model
Part information	Photo, size, code, material, wavelength, coating, or thread type
Requirement	Quantity, destination country, urgency, and target application
